

## EDGE RESTRAINT SOLUTIONS

Cinnamon Metals solutions can help designers to optimize and use all the space possible and make a combination of shapes as they need in their projects. These products are available in mill finish aluminum .063" and .080" according to the customer needs, and also, we can manufacture them in different materials and colors. All the patterns can be customizable according to each project. For example, if you don't need drainage slots, or you need different dimensions, just ask for it.

### LH-10

LH-10 profile is the most common used for green roofing contractors because it's rigid and easy to install in the field. Available in 10'.

### CH-10

CH10 It's similar in structure to the LH10, but it provides the capability of going in different ways. Usually used when the design needs to go in different ways or to make radius around the field. It's used for both green roofing and landscaping applications. Available in 10'.

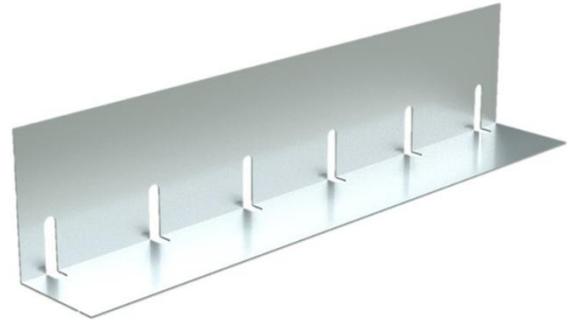

*Manufacturing Metal solutions with high-quality levels. If you need any advice on your project, please contact us, and we will help you to find the best solution.*

- Green roofing, Landscaping and LEED projects
- Roofing, Masonry and Waterproofing
- Vents and Louvers
- Custom sheet metal parts

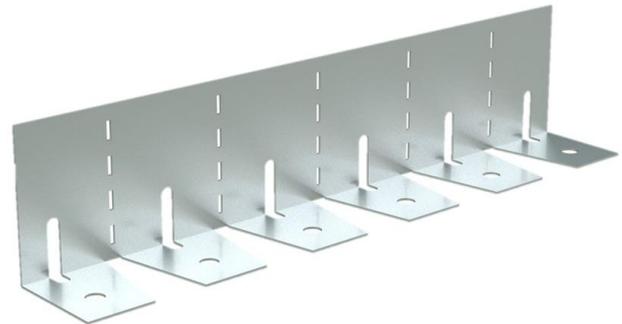

### L-10

Manufactured with the same concept of the LH10, but without hemmed, obtaining a cleaner aesthetic. Available in 10'.

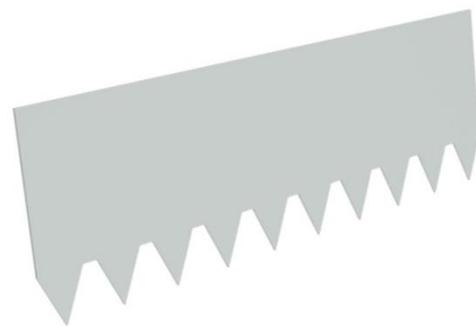

### C-10

This profile is commonly used for landscaping because it is flexible and firm, but also it hides into the vegetation. Available in 10'.

### FS-4

It's an excellent solution when the patio or garden is ready, and you want to avoid extreme digging. Available in 48'.
